

Career development does not just end when you leave school. It is a process that you will be involved with throughout your working life. The skills that you gain in regards to your career development will be the skills to plan your career journey throughout your life, hence the notion of 'life-long learning'. Whether you have just graduated from Brisbane Boys' College, you're currently in Uni, or about to embark on the journey of employment, the following information may be helpful.

If you would like to submit news or information for future editions of the BBC Alumni Careers Newsletter, please feel free to send us an email.

### ***What is a Cadetship?***

A Cadetship Program enables you to gain practical and commercial experience whilst completing your university studies. The Cadetship Program structure varies between employers. A cadetship involves paid employment at the same time as you are studying your degree. This provides students with the opportunity to gain valuable industry experience while still at university. The beauty about Cadetships is that you get paid for the work you do, and depending on the employer, they may even pay your uni fees for you!

The following companies have fantastic cadetship programs. Vacancies vary from city to city, as do application dates.

### **Accounting/Business Cadetships**

## Architecture/Building Cadetships

### Australian Building Codes Board (ABCB)

The ABCB Cadetship is a 12 month government placement that offers you the opportunity to further develop your working knowledge and skills relating to the building and construction industry.

We are looking for applicants with good communication and research capabilities and strong team work skills. Given the nature of our work, the ABCB is specifically interested in applicants who have studied or worked in the following fields:

- Building Certification / Surveying;
- Building / Built Environment;
- Construction Management;
- Architecture; and
- Plumbing or Hydraulic Design or associated field.

The ABCB Office is based in Canberra and is a part of the Commonwealth Department of Industry, Innovation, Science, Research and Tertiary Education (DIISRTE). The Cadetship Program generally commences in February for a period of 12 months, however if required, other time-periods may be negotiated. Please visit following website for further information.
